Dhaka Tribune

2022-2025

https://www.dhakatribune.com/author/tasawar

Sub-editor; Writer

- Wrote many writing assignments and reports and had Opinion pieces published under byline
- Edited multiple articles to be ready for publishing on a daily basis. Researched to proofread and verify that all articles were also factually correct

Designer (Print and Social Media)

- Made page layouts for the printed newspaper pages on *InDesign* every day and made instagram posts on Canva
  Example link to my favourite layouts
- Made carousel posters for the Op-ed Instagram posts on *Canva* and wrote the copy
  Example link to post

Editorial Assistant

- Performed daily administrative tasks, such as: Orgnanizing articles, maintaining email rapport, and uploading articles online

Head of Tribune Z – a weekly page for youth

- Performed all the aforementioned roles
- Managed a team of interns, overseeing, mentoring, and giving feedback to their work
- Scoped for opportunities to engage with and support the youth society

BUMPiT

2021

https://www.kochigamerz.win/BUMPiT

Mobile Game Development

- Developed a simple and unique mobile game with *Unity*
- Was released for *Android* on the Google Play Store – app APK still available on the website
- Created game assets using *Adobe Illustrator*
- Integrated app monetization with *Admob* and IAPs

Canadian Red Cross

2018

Team Leader; Canvasser – Toronto, ON

- Door to door grassroots canvassing, raising funds for local programs run by the Canadian Red Cross. Essentially Sales
- Operated under TNI group and Harris Global Enterprises
- Built friendly rapport with home owners at their doorstep and closed a minimum of one monthly donor a day
- Trained new reps on how to sell to and relate with clients and began to build a team of my own

Real Programming 4 Kids

2017

https://realprogramming.com/

Game Dev Instructor – Toronto, ON

- Taught kids to make video games in a variety of programming levels with *HTML5 + JS*, *Python*, and *Unity*
- Had to communicate difficult concepts such as OOP and game physics mechanisms in an interactive way for the students to understand
- Adapted to teach a range of games from alternatives of Pacman and Tetris to Shooters and Game Engines

University of Toronto
